SKILLS

Stack Focus

React • Node.js • Express • Prisma • PostgreSQL

Frontend

Tailwind CSS

Additional

Next.js • SvelteKit • Firebase • PocketBase • Python

Specialties

API Design • Modular Architecture • Developer-focused UI

LANGUAGES

- Chinese (Native)
- English (Professional)
- Malay (Conversational)

EDUCATION

Bachelor of Software Engineering

Taylor's University

WCGPA: 3.92

Expected Graduation: 2028

Academic Focus: Cybersecurity

PROJECTS

LifeForge – Personal Management System

★ 1.5k+ GitHub Stars

🔗 Tech: React, Express, PocketBase

🐙 Repo Link: github.com/lifeforge-app/lifeforge

📄 Documentation: docs.lifeforge.dev

- Designed a modular architecture enabling a plugin-like ecosystem for user-developed modules
- Supported publishing and one-click installation of modules within the system
- Built authentication and API key management to enable secure extensibility
- Developed scalable data structures for long-term system evolution
- Open-source project with 1.5k+ GitHub stars and growing community interest

ERP System (Client Project) - FEN Education Sdn. Bhd.

🔗 Tech: React, NestJS, Prisma, PostgreSQL, Firebase

- Supported key operational workflows such as CRM, commission tracking, and event management, reducing reliance on fragmented manual workflows
- Built a role-based and module/action-level permission system for granular access control
- Structured backend APIs and database schema using Prisma
- Supported 20+ active users with varying access levels in a production environment
- Developed under real-world client requirements and constraints

Company Website – FEN Education Sdn. Bhd.

🔗 Tech: NextJS, TailwindCSS

🌐 Live Site: www.feneducation.com

- Developed a public-facing website to represent company services and information
- Designed responsive UI with a focus on clarity and usability
- Structured frontend components for maintainability and reuse
- Integrated backend services for dynamic content delivery
